1. Introduction

This Application is designed to be used by part-time job seekers and various employers. It is an online system through which Job Seeker registers on the InfinityJobPortal to get a list of job openings. The job seeker can upload resume and fill the profile presented by the application. After login the job seeker will search for the jobs on various conditions/filters and can apply for the jobs according to his/her portfolio.

This application also serves Job providers/employers to find a candidate for the company. An employer can register on InfinityJobPortal application and upload the relevant company profiles under my company section. After login, employer can post new jobs for the respective companies. When the job seeker apply for a particular job, employer gets a notification. Employer can look into job seekers profile and select a candidate for various stages of selection process.

1.1 Purpose

The advancement in Information Technology and internet penetration has greatly enhanced various business processes and communication between companies and individuals (services provider) and their customers of which online job search is not left out. This online part-time job search system is developed to provide the following services:

1. Enhance job search Processes: To be able to use internet technology to search part-time jobs.
2. Enhance candidate selection Processes: To be able to use technology and help employer find a candidate for their company.
3. Online interview scheduling: A tool through which user can setup interviews for particular job selection.
4. User's registration: A registration portal to hold customer's details, monitor their transaction and use the same to offer better and improve services to them.

1.2 Aims & Objectives

To produce a mobile-based system that allows students and other part-time job seekers to register and search for part-time jobs online and for the employer and individuals to effectively manage their interview selection process. To ease the customer's task whenever they need to search part-time job.

2. Project Description

The InfinityJobPortal application will provide its users the ability to register themselves on the application and search the job according to his/her requirements and interest. Job seeker have to provide all the information about their job skills, education and other activities on the profile. The InfinityJobPortal application will redirect the user to a list of available jobs for them. The user will be able to see the description, requirements of available jobs and also their location, type of job (part time job) and can view the company profile. Not only the app shows different jobs, it will also allow employers to create new company profile and post new jobs. Employers can also download resume of candidates.

2.1 Job Seeker Characteristics:

Job Seeker can register on InfinityJobPortal to upload resume and fill the profile given by admin. After login the job seeker will search for the job on various conditions and can change profiles and resume. Job Seeker can apply for the jobs based on various conditions.

2.2 Job Provider Characteristics:

Job provider can register on InfinityJobPortal and add the company on the platform. Job Provider can add list of companies under his/her profile and post the job related to particular company. Employer can search for the job seekers on various conditions and can offer the job to job seeker according to the job profile. Employer will get the response from job seeker and can send the mail.

2.3 Database:

The Cloud Firestore connectivity will be used for database. Cloud Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud Platform. Like Firebase Realtime Database, it keeps your data in sync across client apps through realtime listeners and offers offline support for mobile and web so you can build responsive apps that work regardless of network latency or Internet connectivity. Cloud Firestore also offers seamless integration with other Firebase and Google Cloud Platform products, including Cloud Functions.

2.4 Tools:

Android Studio

Android studio is the official integrated development environment (IDE) for Google's Android operating system, built on JetBrains' IntelliJ IDEA software and designed specifically for Android development. It is available for download on Windows, macOS and Linux based operating systems or as a subscription-based service in 2020. It is a replacement for the Eclipse Android Development Tools (E-ADT) as the primary IDE for native Android application development.

2.5 Planned Sprint Timeline :

Sprint	Dates
1	13 Sep 2020
2	27 Sep 2020
3	11 Oct 2020
4	25 Oct 2020
5	08 Nov 2020
6	12 Nov 2020

3. Requirements:

3.1 Functional Requirements:

Requirement ID	Requirement Statement	Must/Should/Could/Would	Comments
FR001	A user shall be able to sign up to the application to find a part-time job.	MUST	The system shall save the credentials within the database
FR002	A registered user shall be able to sign in to the application with previous credentials.	MUST	The system shall save the credentials within the database
FR003	A logged in user shall be able to sign out from the application.	MUST	The system shall logout the user from the application
FR004	A registered user shall be able to change and recover the password.	MUST	The system shall save the credentials within the database
FR005	A registered user shall be able to add a profile picture, about section, availability, list of education, experience, skills, contact information and interest to his/her job profile etc.	MUST	The system shall save the credentials within the database
FR006	A registered user shall be able to update his/her profile.	MUST	The system shall update the user password in the database
FR007	A registered user shall be able to search for part time jobs based on location, Job title, Job category, salary, date posted and language.	MUST	The system shall update the user information in the database
FR008	A registered user shall be able upload his/her resume.	MUST	The system shall fetch the cars list from the database and display it on the screen.

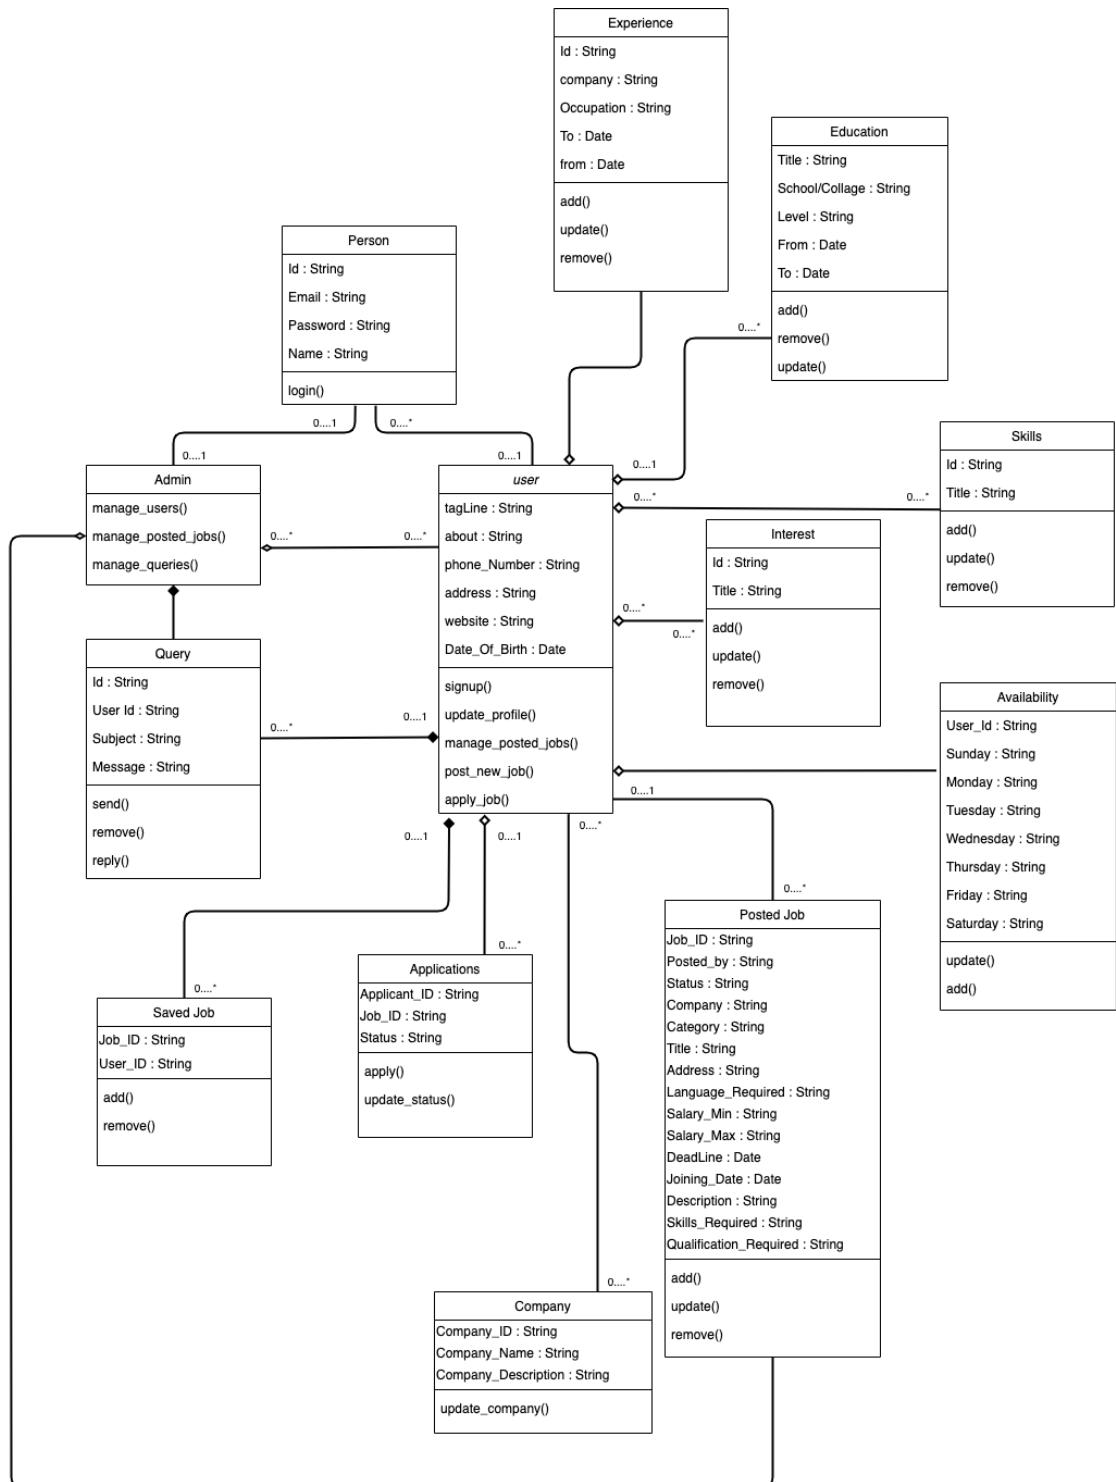

Requirement ID	Requirement Statement	Must/Should/Could/Would	Comments
FR009	A registered user shall be able to edit/update his /her profile.	MUST	The system shall filter all items, according to type selected by the user.
FR010	A system should mark car available as soon as it is returned by previous customer.	MUST	The system shall update the item availability to available as it is returned back.
FR011	A registered user shall be able to get a detailed description of the particular job.	COULD	The system shall update the locations and display the cars accordingly.
FR012	A registered user should get a list of applied jobs.	COULD	The system should update the payment methods entered by the user temporarily.
FR013	A registered user shall be able to remove jobs from the saved jobs sections.	MUST	The system shall be able to add/update cars in the database.
FR014	An employer shall be able to post jobs.	MUST	The system shall update the posted job in the database.
FR014	A registered user should get the location of the company/work location.	MUST	The system shall be able to add/update the cars in the database.
FR015	A registered user should be able to communicate with the employer when selected for the role.	MUST	The system shall update the users/ user information in the system.
FR016	A registered user should be notified about his/her application status(application submitted, read by employer.	COULD	The system shall add the reviews and ratings in the database.

3.2 Non-Functional Requirements:

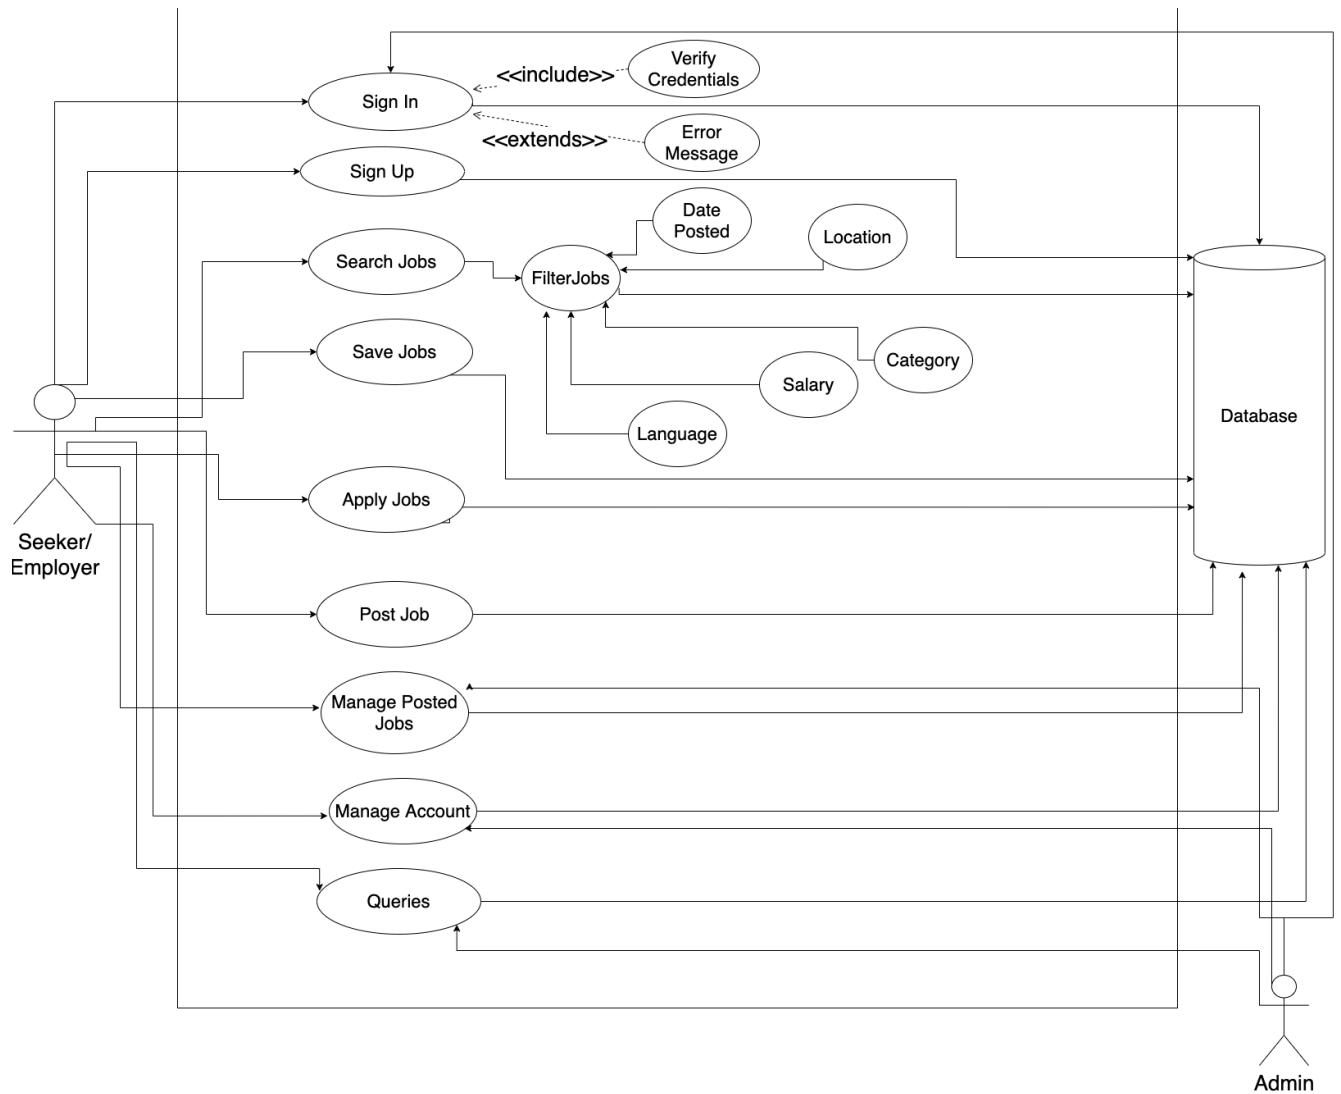

Requirement ID	Requirement Statement	Type
NFR001	Passwords shall never be visible at the time of entry or at anytime.	Security
NFR002	The password length should be minimum 8 characters.	Security
NFR003	A user shall be notified when multiple device login happens.	Security
NFR004	A customer can edit profile at anytime and the system should update profile within 5 seconds.	Performance
NFR005	A security email is mandatory at the time of password reset.	Security
NFR006	Admin can add/integrate more features in future.	Integrability
NFR007	The default language should be English so it is easy for everyone to use.	Usability
NFR008	The flow of app should be understandable for first time user.	Usability
NFR009	The system should be available to access at any point of time	Availability
NFR010	Errors should be considerably minimised and an appropriate message that guides the user to recover from an error should be provided.	Performance
NFR011	The admin should update jobs list according to the user feedback.	Maintainability
NFR012	A logged in user shall be able to maintain communication at anytime.	Maintainability
NFR013	The system should not be shut down for maintenance for more than 2 days.	Reliability
NFR014	When the new version of application is available it should be possible to upgrade from previous version to new one.	Reliability
NFR015	The application should run on any Android OS based device.	Compatibility
NFR016	In case the system crashes the recovery system should save last stable version.	Reliability

4. UML Diagrams and charts:

4.1 Class Diagram

4.2 Use-Case Diagram

4.3 Use-Case Description:

1. Sign Up

Primary Actors	User
Stakeholder & Interests	A new user able to sign up on the application.
Secondary Actor	Database
Pre-conditions	User's device is connected to the internet
Success Guarantee	User has successfully signed up
Main Success Scenarios	<ul style="list-style-type: none">a) The user has entered all correct details.b) The user has been notified about the registration being completed.
Extensions	While signing up, if there is some problem on the server side, the user will be notified about it.
Special Requirements	Information should be readable.

2. Sign In

Primary Actors	User or Admin
Stakeholder & Interests	Users and admins are able to login to the app.
Secondary Actor	Database
Pre-conditions	User's and admin's device should be connected to the internet and the user or admin should have a registered account.
Success Guarantee	User or admin has to login to the app successfully.
Main Success Scenarios	The user and admin have entered the correct user name and password.
Extensions	If there will be any problem regarding login on the server side, the user and admin will be notified.
Special Requirements	Information should be readable.

3. Report Queries

Primary Actors	User
Stakeholder & Interests	Users can report their queries.
Secondary Actor	Database or admin
Pre-conditions	Users should already login to the app and have access to the internet.
Success Guarantee	The user has sent the query.
Main Success Scenarios	The user has been notified about the success of the sent query.
Extensions	If there will be any problem regarding reporting query on the server side, the user will be notified.
Special Requirements	Information should be in readable form.

4. Manage Account

Primary Actors	User or admin
Stakeholder & Interests	Users and admin can manage(update or delete) the user's account.
Secondary Actor	Database
Pre-conditions	Admins or users have access to the internet and have already signed in to the application.
Success Guarantee	They have successfully updated the account.
Main Success Scenarios	They user or admin have notified regarding the respected updation of account.
Extensions	If there will be any problem regarding the management of the account on the server side, the user will be notified.
Special Requirements	Information should be readable.

5. Post Job

Primary Actors	User
Stakeholder & Interests	Users can post Jobs.
Secondary Actor	Database
Pre-conditions	Users have access to the internet and have already signed in to the application.
Success Guarantee	He has successfully posted the job.
Main Success Scenarios	The user has been notified regarding the respected success of post jobs.
Extensions	If there will be any problem regarding posting of a job on the server side, the user will be notified.
Special Requirements	Information should be readable.

6. Save Jobs

Primary Actors	User
Stakeholder & Interests	Users can save jobs to apply in future
Secondary Actor	Database
Pre-conditions	Users have access to the internet and have already signed in to the application.
Success Guarantee	They have successfully saved the job.
Main Success Scenarios	They have been notified regarding the respected saved job.
Extensions	If there will be any problem regarding update of profile on the server side, the user will be notified.
Special Requirements	Information should be readable.

7. Apply Jobs

Primary Actors	User
Stakeholder & Interests	Users can apply for the jobs
Secondary Actor	Database
Pre-conditions	Users have access to the internet and have already signed in to the application.
Success Guarantee	They have successfully applied for the job.
Main Success Scenarios	They have been notified about the success of the applied job.
Extensions	If there will be any problem regarding applying jobs on the server side, the user will be notified.
Special Requirements	Information should be readable.

8. Manage Posted Jobs

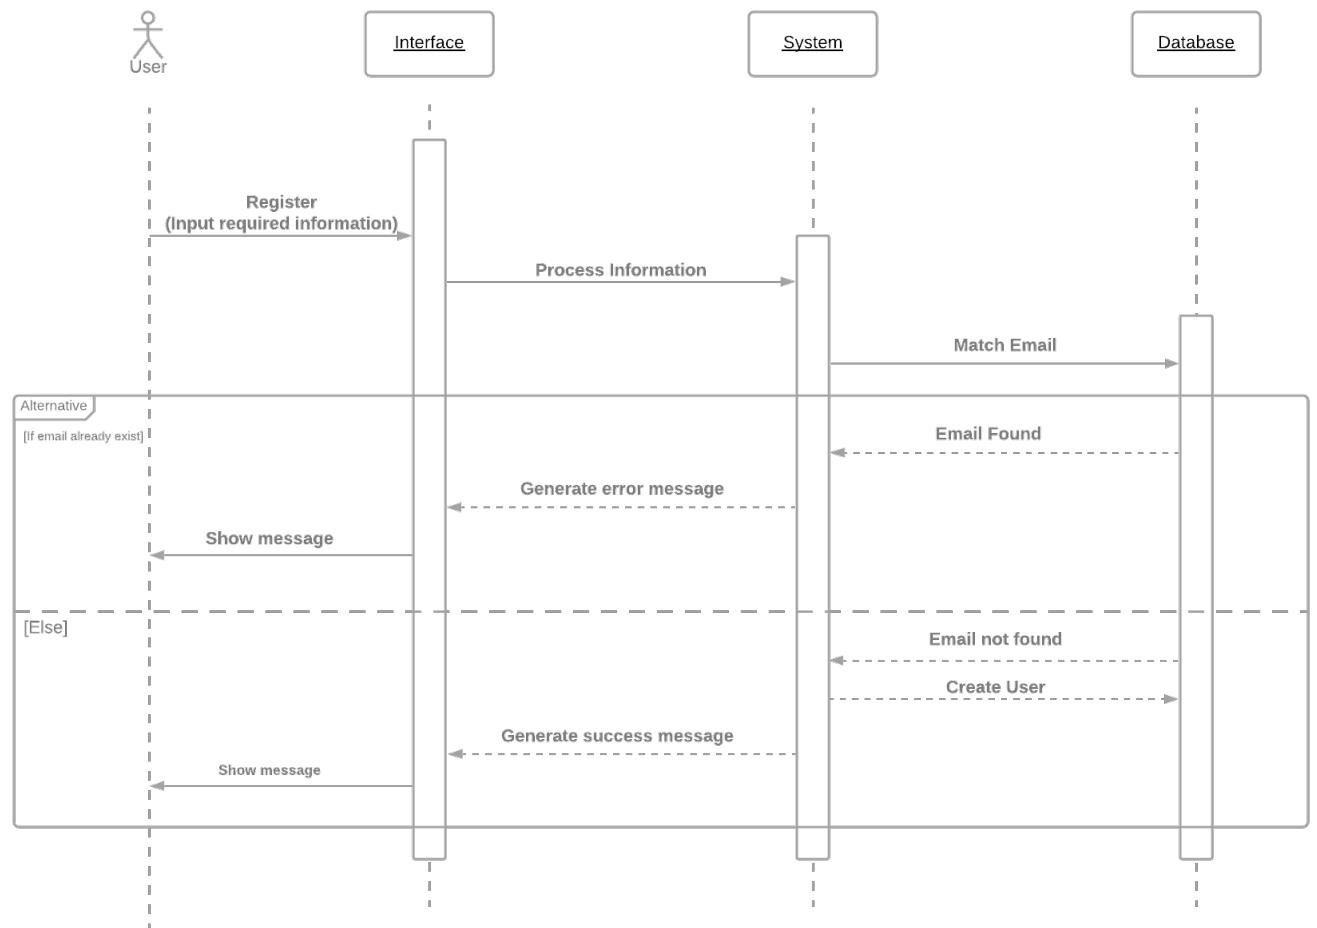

Primary Actors	User or admin
Stakeholder & Interests	Users and admin can manage posted jobs.
Secondary Actor	Database
Pre-conditions	Admins or users have access to the internet and have already signed in to the application.
Success Guarantee	They have successfully managed(update, delete) the posted job.
Main Success Scenarios	They user or admin have notified regarding the respected updation of posted jobs.
Extensions	If there will be any problem regarding the management of the posted jobs on the server side, the admin and user will be notified.
Special Requirements	Information should be readable.

9. Search Jobs

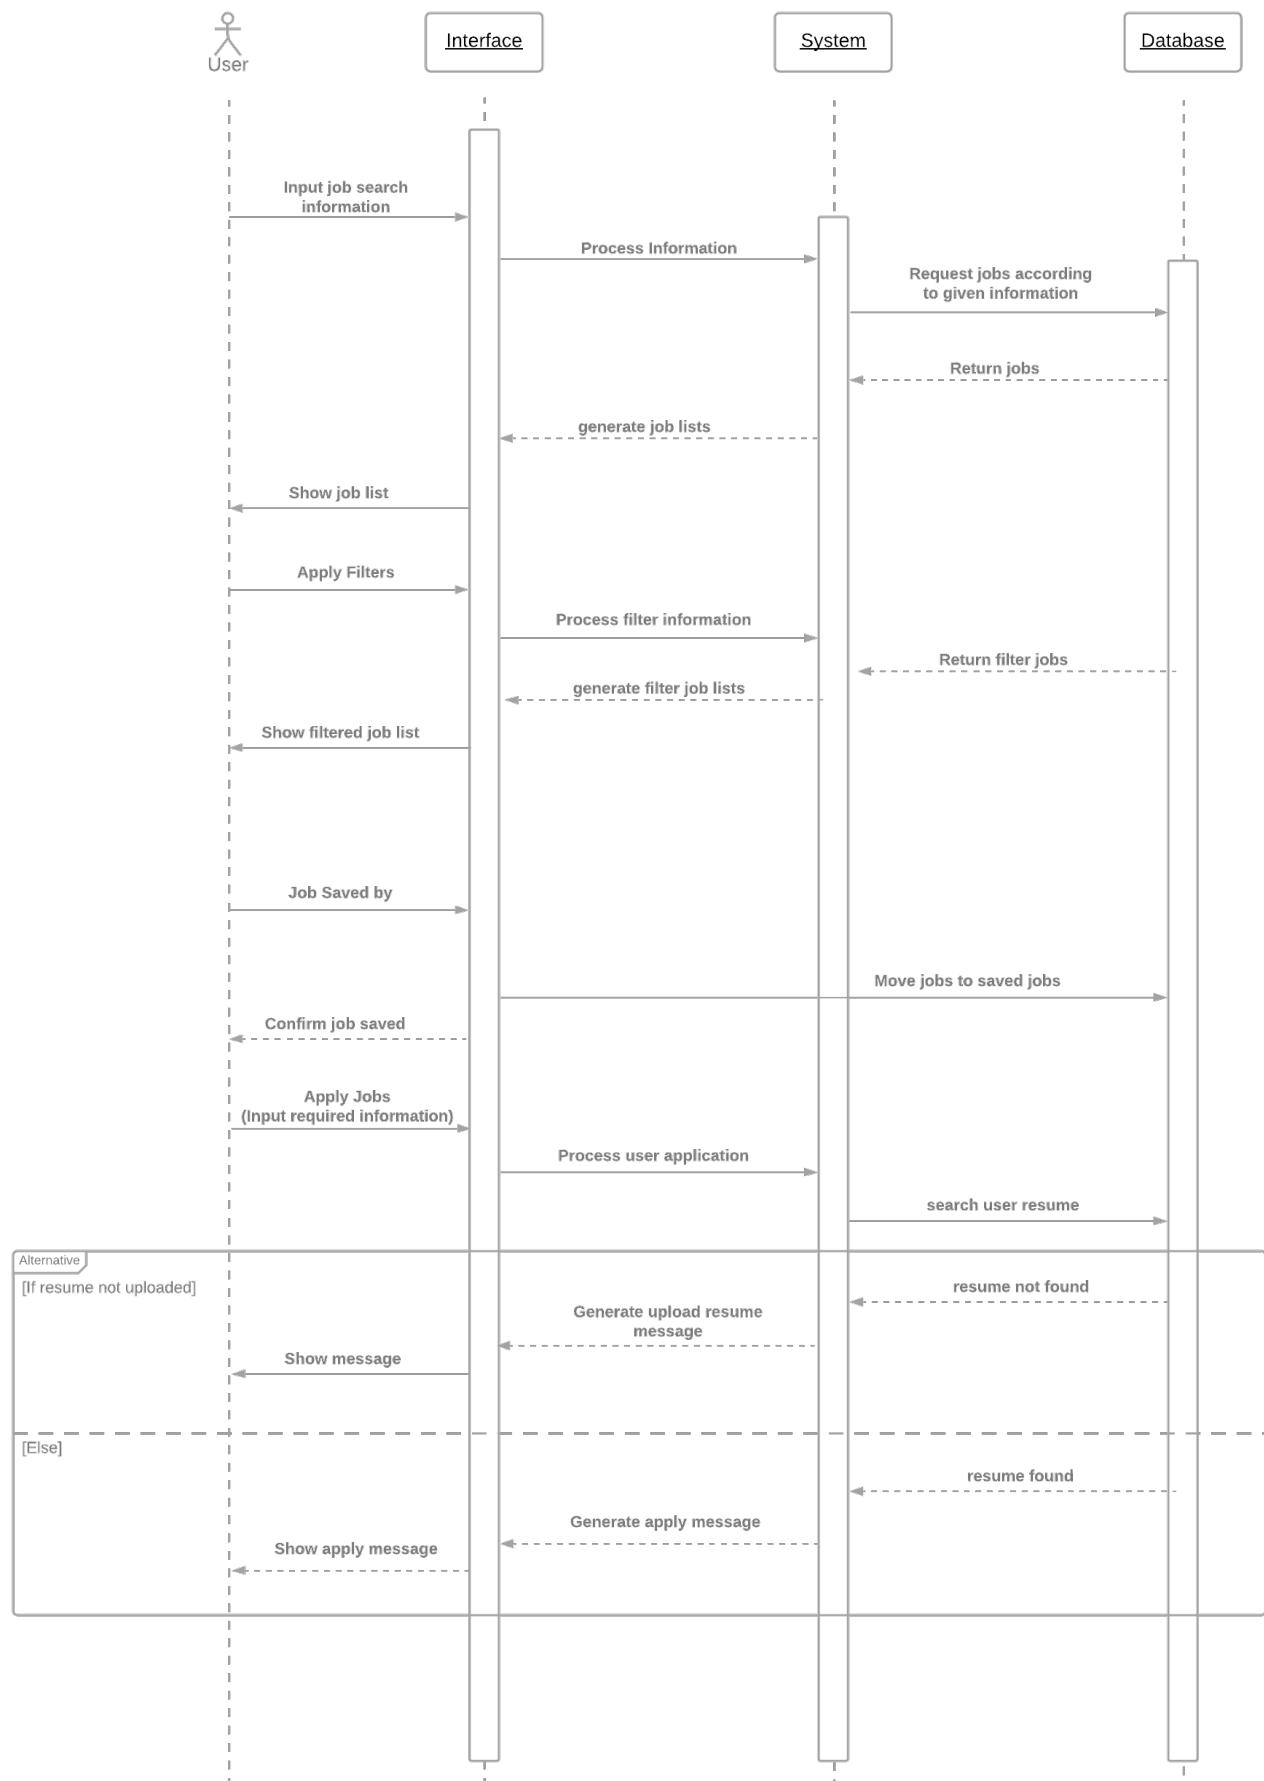

Primary Actors	User
Stakeholder & Interests	Users can search jobs on the behalf of the date posted, location, salary and category .
Secondary Actor	Database
Pre-conditions	Users have access to the internet and have already signed in to the application.
Success Guarantee	They have successfully searched the job.
Main Success Scenarios	The user has been notified regarding the respected search for a job.
Extensions	If there will be any problem regarding search for a job on the server side, the user will be notified.
Special Requirements	Information should be readable.

5.3 User Personas

A user persona card for Arzoo Padam, featuring a portrait of a smiling woman, a quote, and demographic information.

USER PERSONA
Arzoo Padam

ABOUT

Jiya has recently moved to Montreal from India. She has no new friends at the university and doesn't know anybody in Montreal. She wants a part-time job to earn for her expenses but couldn't find any job in her area. She scrolls for various online job advertisements but couldn't find a job for herself.

GOALS

- To find a part-time job according to her caliber.
- Wants to earn money for expenses and tuition fees.

PAIN POINTS

- There is no tool to search for part time jobs in Montreal.
- She usually goes from door to door and handover the resume to find a job.

Motivations

PERSONALITY

Introvert	Extrovert
Analytical	Creative
Thinking	Feeling
Judging	Perceiving
Passive	Active

NEEDS

- Looking for a platform to search for part-time jobs.

Preferred Channels

- WhatsApp, Viber
- Youtube
- Instagram, Snapchat
- Email, Mobile

6. Conclusion

As college students have many other part-time job seekers, it is very difficult to find job opening as they are new to this part of the world. InfinityJobPortal android application will help job seekers find a job according to their skills and passion. It also helps employers to find a suitable employee for themselves in a very efficient and fast process. In these times of COVID-19 crises, InfinityJobPortal will totally eradicate the physical presence of candidate for job selection process in most cases. This android based application will offer an advantage to both job seekers and job providers, as a medium to effectively manage the selection process.
